

STEPS TO SOLVE Printing ISSUE IN OUTLOOK EXPRESS

First, using Internet Options, delete all cookies, [temp files](#) and objects.
This might
fix it for some people.

In my case, I also had to use regsvr32 from the start/run command to re-register vbscript.dll and [jscript.dll](#).

At the Start/Run applet execute these commands

```
regsvr32 vbscript.dll
```

```
regsvr32 jscript.dll
```

```
regsvr32 ole32.dll
```
